EDUCATION

St. Petersburg College

Clearwater, FL

Bachelors in Technology Development and Management

Codecademy

Remote

Front End Developer Path Certificate

EXPERIENCE

Front End Developer

July 2023 - Present

InvestCloud

Tampa, FL

- Demonstrated expertise in agile development methodologies, consistently delivering iterative releases of front end solutions that align with business goals, and effectively collaborating with cross-functional teams in proprietary system environments
- Crafted reusable CSS styles to ensure consistent adherence to product standards
- Collaborated with cross-functional teams to develop front-end solutions, resulting in a 95 percent release success rate
- **Skills: HTML5, CSS, Proprietary Systems, Jira, Agile Development, Qmerty testing**

Web Developer

September 2022 - May 2023

*M*CARBO*

Clearwater, FL

- Used JavaScript to create custom functionality and interactivity on web pages, real-time updates, improving the user experience and engagement
- Customized Bootstrap's CSS styles and classes to match the design specifications and branding guidelines of the team, ensuring consistency and visual appeal across all pages.
- Used jQuery to manipulate and traverse the DOM, dynamically generating HTML content and updating the user interface in real-time
- **Skills: HTML5, Bootstrap, JavaScript, jQuery, Cart, Azure**

Software Engineer Intern

August 2022 - October 2022

IpserLab

Remote

- Implemented responsive design using TailwindCSS and React JS, resulting in an increase in mobile usability
- Utilized Figma to create pixel-perfect web pages that met design specifications and requirements
- Utilized React Router to create a dynamic client-side routing system, enabling users to navigate between pages and components without triggering a server-side request.
- Created reusable and maintainable React components using JSX syntax, incorporating best practices for code organization, separation of concerns, and functional programming
- **Skills: HTML5, TailwindCSS, React, Redux, Node.js MySQL**

PROJECTS

Mentality E-Commerce Store | *React, TailwindCSS, Node, Express, MongoDB, Sentry*

- Designed and implemented responsive layouts using Tailwind CSS and React.js
- Built a system for withdrawing and depositing money, including real-time updates to account balances
- Implemented login and logout functionality across multiple web pages and components using React.js
- Used Express.js routing to handle GET and POST requests for different web pages and API endpoints
- Utilized MongoDB to store and retrieve user and transaction data

TECHNICAL SKILLS

Languages: HTML5/CSS3, JavaScript(ES6+), MySQL, Typescript, MongoDB

Frameworks: Next.js, React, React Native, Node, Express, Tailwind CSS

Tools: Git, Github, VS Code, Jira, Vite
